# QUIENES SOMOS

## About Us

**INTERMATEX** Grupo es el resultado actual de un esfuerzo conjunto que se inició en 1988 cuando Fidel Gil y Virginia Miralles fundaron la empresa matriz Matex Spain.

Desde entonces, dentro de un proceso de adaptación continua al mercado y una evolución constante en innovación y desarrollo de producto, se han ido perfilando las líneas que hoy en día identifican a Intermatex Grupo:

Mosaico decorativo, incluyendo una amplia diversidad de materiales y de formatos, Porcelánico, principalmente rectificado, tanto esmaltado como técnico en una gran variedad de formatos desde 30x60 hasta 60x120 cms. Y por último, las dos líneas más novedosas, pavimento SPC y revestimiento decorativo en WPC.

Tras afrontar los retos que la economía global ha planteado estos últimos 15 años, la empresa hoy en día es más eficiente, optimizada y con una gestión más solidaria e implicada en los diferentes procesos de la actividad ordinaria de la empresa y, lo más importante, plantea su crecimiento desde una posición más sólida.

Dentro de este entorno tan competitivo, Intermatex tomó una importante decisión estructural que asegura el mantenimiento de sus políticas de expansión, y tras dos años de planificación, en 2019, se inauguraron las nuevas instalaciones en el polígono industrial 'El Colador' de Onda, en Castellón (España).

Un movimiento estratégico que era vital para dar una continuidad sostenible al crecimiento de la empresa que permitiese seguir ofreciendo el mejor servicio a sus clientes. La nueva sede de la compañía implica una gran mejora en cuanto al espacio, principal restricción al crecimiento en sus antiguas instalaciones de Villarreal.

Esta nueva ubicación incluye:

Casi 1.000m<sup>2</sup> de oficinas, que permiten una mejor y más funcional organización de los departamentos,

Más de 8.500m<sup>2</sup> de almacén cubierto, indispensables para mantener el 100% de las mercaderías en un perfecto estado para su venta,

Y una zona de carga de aproximadamente 4.000m<sup>2</sup> con doble muelle fijo, imprescindibles, por un lado, para optimizar la velocidad de las cargas de camión abierto y, por otro, dotar de agilidad las cargas de contenedor.

De esta forma Intermatex deja atrás, en Villarreal, 15 años de un gran progreso, crecimiento, evolución y madurez, que se perciben en la propia organización de la empresa, en sus estándares, en su visión y misión y que más tangiblemente puede observarse en su catálogo y en su penetración de mercado.

Fruto de esta evolución y crecimiento son, por ejemplo, los 8 almacenes que tiene Intermatex a lo largo del continente americano y que dan servicio a centenares de clientes diariamente.

Agradecemos genuinamente a todos nuestros clientes y colaboradores la fidelidad y apoyo que a lo largo de estos años nos han mostrado y les invitamos a que participen con nosotros de los retos que tenemos por delante.

# INTERMATEX GRUPO

Intermatex Group

**Intermatex Grupo** is the current result of a joint effort that began in 1988 when Fidel Gil and Virginia Miralles founded the parent company Matex Spain.

Since then, within a process of continuous adaptation to the market and a constant evolution on product innovation and development, have been determining the lines that now identify Intermatex Grupo:

Decorative mosaic, including a wide variety of materials and formats, Porcelain, mainly rectified, both glazed and technical in a variety of formats from 30x60 to 60x120cms. And finally, the two newest lines, SPC flooring and WPC decorative wall coverings.

After facing the challenges that the global economy has raised these last 15 years, the company today is more efficient, optimized and with a more solidary and involved management in the different processes of the ordinary activity and, most important, it raises its growth from a more solid position.

Within this very competitive environment, Intermatex made an structural important decision that ensures the continuity of its expansion policies, and after two years of planning, in 2019, the new facilities were inaugurated in the industrial estate 'El Colador' in Onda, Castellon (Spain).

A strategic movement that was vital to give a sustainable continuity to the growth of the company that would allow to continue offering the best service to its clients. The new headquarters of the company implies a great improvement in terms of space, the main restriction to growth in its previous facilities in Villarreal.

This new location includes:

Almost 1,000m<sup>2</sup> of offices, which allow a better and more functional organization of the different departments,

More than 8,500m<sup>2</sup> of covered warehouse, indispensable to keep 100% of the merchandise in perfect condition for sale,

And a loading area of approximately 4.000m<sup>2</sup> with fixed double container dock, essential, on one hand, to optimize the speed of truck loads and, on the other, to provide agility container loads.

In this way Intermatex leaves behind, in Villarreal, 15 years of great progress, growth, evolution and maturity, which are perceived in the company's own organization, in its standards, in its vision and mission and that can be more tangibly observed in its catalog and in its market penetration.

The result of this evolution and growth are, for example, the 8 warehouses that Intermatex has throughout the American continent and which serve hundreds of customers daily.

We genuinely thank all our clients and collaborators for the loyalty and support that they have shown to us throughout these years and we invite them to participate with us in the challenges that lie ahead.

| Ángulo inclinación<br><i>Slope angle</i> | 6° / 10°                | 10° / 19°              | 19° / 27°           | 27° / 35°               | > 35°                            |

Plano inclinado con ángulo variable impregnado con aceite. Mide el ángulo inclinado que permite estar de pie con seguridad.  
*Inclined plane with variable grades covered with oil. This measures the angle of incline that allows one stand safely.*

| DIN 51097 | MÉTODO DE RAMPA CON PIES DESCALZOS /<br>THE BAREFOOT RAMP METHOD |
|-----------|------------------------------------------------------------------|
|-----------|------------------------------------------------------------------|

|                                          | CLASE A<br>CLASS A     | CLASE B<br>CLASS B  | CLASE C<br>CLASS C      |
|------------------------------------------|------------------------|---------------------|-------------------------|
| Adherencia<br><i>Adherence</i>           | Media<br><i>Medium</i> | Alta<br><i>High</i> | Fuerte<br><i>Strong</i> |
| Ángulo inclinación<br><i>Slope angle</i> | 12° / 18°              | 18° / 24°           | > 24°                   |

Plano inclinado con ángulo variable impregnado con solución jabonosa. Mide el ángulo inclinado que permite estar de pie con seguridad.  
*Inclined plane with variable grades covered with soapy solution. This measures the angle of incline that allows one stand safely.*

| ENV-12633 | MÉTODO DEL PÉNDULO (UNE ENV 12633 - 2003) /<br>THE PENDULUM METHOD (UNE ENV 12633 - 2003) |
|-----------|-------------------------------------------------------------------------------------------|
|-----------|-------------------------------------------------------------------------------------------|

|                            |                                                                                                                                 |                                                                                                                                            |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CLASE 1<br/>CLASS 1</b> | Zonas Interiores secas, pendiente <6%                                                                                           | <i>Interior areas that are dry with a grade of &lt;6%</i>                                                                                  |
| <b>CLASE 2<br/>CLASS 2</b> | Zonas Interiores secas, pendiente >6%<br>Zonas Interiores húmedas, terrazas, cubiertas, vestuarios duchas, aseos, cocinas, etc. | <i>Interior areas that are dry with a grade of &gt;6%<br/>Interior wet areas, covered terraces, showers, bathroom floor, kitchens, etc</i> |
| <b>CLASE 3<br/>CLASS 3</b> | Zonas con agua, grasas, lubricantes, etc.<br>Zonas Interiores húmedas con pendiente >6%<br>Zonas exteriores, piscinas.          | <i>Wet/greasy/lubricated environments<br/>Interior wet areas with a grade of &gt;6%<br/>Exterior areas, swimming pools</i>                 |

El ensayo utiliza un péndulo que tiene un deslizador de caucho que en función del ángulo alcanzado después de contactar con la superficie de la baldosa, nos dará la clase de la baldosa. A mayor clase mayor resistencia.  
*The method entails the use of a pendulum fitted with a rubber slider. This gives slip class of the tile, depending on the angle that is attained after contact with the tile surface. The greater class, the higher resistance value.*
